National Terrorism Advisory System

Unclassified // FOUO
24 Hour STAC Report

- Report attached

SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Normal Operations	Normal Operations	Normal Operations	Normal Operations

Cal OES State Operations Center

- The State Operations Center (SOC) is preparing to activate to Level 3 on 03/01/18 at 2000 hours.

Cal OES COASTAL REGION

- Nothing significant to report.

Cal OES INLAND REGION

Proclamation, Shasta County

- On 03/01/18, the California State Warning Center received a proclamation from Shasta County, declaring a local emergency due to unstable and volatile explosive ordinance discovered at a property in their jurisdiction. At this time they are not requesting assistance.

Cal OES Inland Region Storm Activity

An upcoming storm system will bring significant precipitation through Saturday for areas in the Cal OES Inland Region.

- There are no mutual aid requests and no search and rescue (SAR) mission tasking requests at this time.

Activations

- Cal OES Inland Region Emergency Operations Center (Inland REOC) will be activated to Level 3 (Lowest) – Virtual, Duty Officer monitoring
- El Dorado County EOC is activated at Level 1 (Highest, Operational Period – 03/01/18 and 03/02/18, 0700 – 1700 hours
- Placer County EOC is activated at Level 3 (Lowest), Operational Period – 03/01/18, 0800 – 1700 hours
- Calaveras County is activated at Level 3 (Lowest), Operational Period – 03/01/18, 0800 – 1700 hours

Deployments

- 1 Cal OES Inland Region Senior Emergency Services Coordinator (ESC) to El Dorado County EOC
- 1 Cal OES Inland Region ESC to Calaveras County EOC
- 1 Cal OES Inland Region ESC to Santa Barbara County EOC

Cal OES SOUTHERN REGION

- See next slide for information

SITUATION SUMMARY

Significant Precipitation, Potential Debris Flows, Santa Barbara County

An upcoming storm system will bring significant precipitation through Saturday for areas in Santa Barbara County.

- The heaviest precipitation is expected to occur on 03/02/18, 0200 – 0800 hours.
- This creates a strong probability for debris flows to occur at recent burn scar areas.

Activations

- Cal OES Southern Region Emergency Operations Center (Southern REOC) will activate at Level 2 at 2000 hours on 03/01/18.
- The Santa Barbara County Emergency Operations Center (EOC) is activated at Level 2.

Deployments

- 1 Cal OES Southern Region Acting Regional Administrator (RA) deployed to Santa Barbara County EOC
- 1 Cal OES Southern Region Senior Emergency Services Coordinator (ESC) deployed to Santa Barbara County EOC
- 2 Cal OES Southern Region ESCs are deployed to Santa Barbara County EOC
- 2 Cal OES Fire and Rescue Branch Assistant Chiefs
- 1 Cal OES Law Branch Assistant Chief to the ICP
- 1 Cal OES Law Branch Assistant Chief to Santa Barbara County EOC
- 1 Local Government Type II IMT

Resources Assigned

- Urban Search and Rescue Region Task Force 12 - Santa Barbara County
- Cal OES Swiftwater – Search and Rescue Team 12 - Long Beach, Los Angeles County

Mandatory Evacuations

- On 03/01/18 at 1200 hours, Santa Barbara County Sheriffs Office (SBSO) issued mandatory evacuation orders for residents in the Thomas, Sherpa, and Whittier burn areas along the Santa Barbara County south coast (Goleta, Santa Barbara, Montecito, Summerland, and Carpinteria); requesting resident to exit the area prior to 1800 hours on 03/01/18.
 - Approximately 20,000 people impacted.

Shelter

- American Red Cross Evacuation Center, Earl Warren Showgrounds, 3400 Calle Real, Santa Barbara, opened in anticipation of receiving any Access and Functional Needs (AFN) evacuees.
- City of Santa Barbara and the City of Carpinteria have set up evacuation plans for those needing help with transportation to the shelter.
- Casa Dorinda, a life care community, was fully evacuated on 02/28/18, which included 300+ Assisted Living and Skilled Nursing residents.
- County Public Health has pre-identified those facilities and AFN patients within the proposed evacuation areas that may need assistance with transportation and have proper planning in place.

SITUATION SUMMARY

Significant Precipitation, Potential Debris Flows, Santa Barbara County (Continued)

Missions

- 2018-SREOC-45462: Two California Department of Water Resources (DWR) subject matter experts.
- 2018-LAW-45467: SBSO request [California National Guard \(CNG\)](#) high water vehicles to [Unified Command Post \(UCP\)](#)

FIRE ACTIVITY

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

An active winter-type storm will continue moving across the region in various stages through Saturday. There will be a break in the precipitation behind the front moving through the region today, but showers will soon deliver more precipitation again and even a few thunderstorms will become possible. Some showers will be quite heavy. Significantly colder air will move into the region starting later today and linger into Saturday, lowering snow levels quite a bit. Somewhat warmer, much drier weather arrives Sunday for a couple of days followed by more precipitation the middle of next week.

Gusty southerly winds will continue today. Although some areas will see lighter winds for a while, they will pick up again. The strongest gusts will continue to be mostly 25-40 mph, but also locally stronger, especially in the higher elevations where gusts of 50-60 mph will be fairly common. The combination of wind and snow will create blizzard conditions in the mountains.

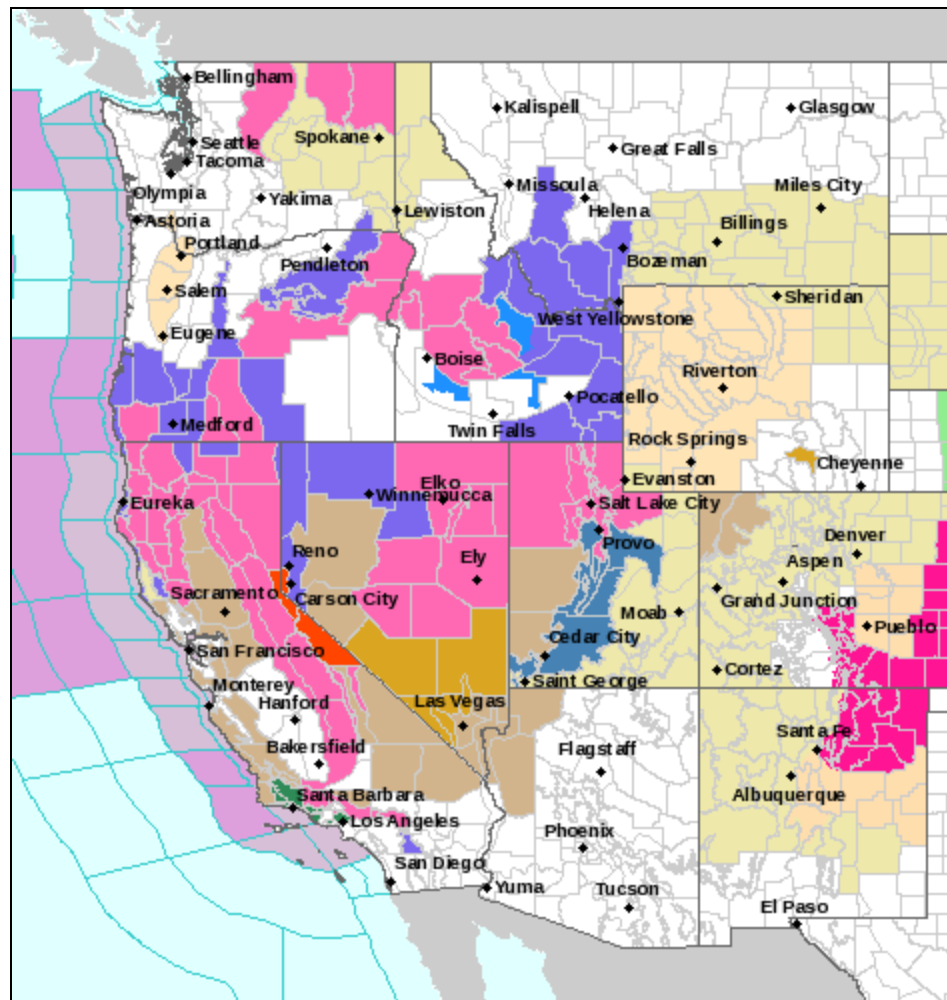

Snow levels around 2,000-2,500 ft in the north and 3,500-4,000 ft in the south will prevail today but drop significantly tonight as the coldest air with this weather system moves into the region. Snow levels will drop to as low as around 1,500 ft in the north and 2,000-2,500 ft in the south, although some northern areas around 1,000 ft could see some overnight snow showers but with little accumulation. Precipitation should be showery through much of that time, so snow accumulations at the lowest elevations are not expected to be more than a few inches. Storm total snow amounts could be around 4-6 inches near 2,000 ft and 1-2 ft over the mountain passes with significantly more than that likely at the higher elevations.

SOUTHERN CALIFORNIA

A storm centered off the coast of the Pacific Northwest will bring showers to Central California through Saturday evening and showers to the region tonight through Saturday evening. Most foothill and mountain locations will receive between 1 and 4 inches of rainfall and most coastal and valley locations will receive between a half inch and an inch of rainfall. The snow level will be between 5,000 and 6,000 feet. South to west winds of 20 to 40 mph will surface across the wind prone mountain and desert areas this afternoon through Saturday evening. Temperatures will be 5 to 10 degrees below normal through Saturday, with upper 30s and 40s across the mountains and 50s to low 60s in the valleys. A weak ridge of high pressure will build into California from the Pacific Ocean bringing significant warming and drying Sunday and Monday. Maximum temperatures will warm to around 5 degrees above normal putting the valleys of Southern California into the mid 70s Monday through the middle of next week. Minimum humidity will drop mainly into the teens Monday through the middle of next week.
